Career Summary

Ambitious Software Engineering candidate specializing in Manual Validation, Backend Data Integrity, and API Testing. Experienced in managing fast-paced client-facing workflows and technical specifications. Proficient in designing comprehensive Requirements Traceability Matrices (RTM), executing boundary analysis, and leveraging Postman for endpoint verification. Strongly focused on transitioning foundational manual testing workflows into scalable automation frameworks

Core Competencies

- **Testing Methodologies:** Functional Testing, Regression Testing, Smoke Testing, Boundary Value Analysis (BVA), Equivalence Partitioning (EP).
- **API & Backend Testing:** Postman (Collections, Variables, Payloads), Python (Foundational), JSON Parsing, Structured SQL Queries.
- **Documentation & Tools:** Requirements Traceability Matrix (RTM), Bug Lifecycle Logging, Test Case Design, Jira, GitHub.
- **Core Concepts:** Software Development Life Cycle (SDLC), Software Testing Life Cycle (STLC), Agile/Scrum Frameworks.

Professional & Technical Experience

Independent Web Security Auditor | UIIT Student Web Portal

- **Situation & Task**: Initiated an independent, proactive security and functional audit of the university's live student portal to identify potential vulnerabilities and logic flaws.
- **Action**: Executed rigorous manual testing, focusing on boundary value analysis, functional flow interruptions, and session management inconsistencies.
- **Result**: Successfully identified and documented critical vulnerabilities that could lead to data exposure, compiling a professional bug audit report detailing reproduction steps and severity levels.

Team Lead (Operations & Reporting) | Cloud Wave Innovations | Rawalpindi, Pakistan | July 2025 - Dec 2025

- **Situation & Task**: Directed daily operations for an 11-person inbound sales team, responsible for strict adherence to delivery targets and quality standards.
- **Action**: Acted as the central point of quality control, identifying workflow bottlenecks, resolving daily operational bugs and implementing standardized reporting frameworks.
- **Result**: Streamlined task execution and reduced logging error rates, ensuring 100% adherence to project timelines and delivering weekly data-driven analytics to stakeholders.

Education

BS in Software Engineering | University Institute of Information Technology (PMAS-AAUR), Rawalpindi | 2023-2027

Certifications

- Learning Jira Leveraging Sprints Releasing Features Fixing Bugs and Tracking Development - linkedin
- Master Advanced API Testing with Postman & Automation - EDUCBA
- Professional Diploma in Agile Product Management - Udemy
- Product Analytics Micro-Certification - Product School & Mixpanel

Workshops & Seminars

- Build with AI Workshops - GDG Cloud Islamabad
